Ust Mal File No. 92 of 1908

Serial No. 3

From the Sanitary Commr. No 183 S 1.09. It states that the Central Sanitary Board are afraid that for the present (i) the bed of the nalla may be properly counterpraded, (ii) the banks on either side, but especially the Egg. side be levelled so as to do away with all ~~ca~~ recesses (iii) latrines may be provided and (iv) the water-supply of the locality may be amply provided for.

15 The estimates do not provide for the last 2 items mentioned in the Sany Comr's letter Draft sanctioning the Chairman's proposals as approved by the Hon Councillor is in the file

16 Submitted for orders

Hon Sec 9/1/09 17 It is not clear from the Sani Comrs letter whether the Sanitary Board does not approve of the filling up of the nalla up to the ground level from the Police Station to the cross-road or continuation of the rampart wall. Please put up a draft thereon for information on this point. The enclosures may be sent for reference and return.

Board but that as the cost would be very heavy viz Rs 49,725/-, they recommend counter grading, that the accumulation of water near the cross bund may be prevented by the 12" stone-ware piping already existing, that it ought to be sufficient to clear the pipes already existing which have been allowed to be choked and that the clearing would not be difficult

25. The Trust Board request sanction for 2 estimates amounting to Rs 51,436/- and Rs 4,078/- respectively, the former for filling up a portion of Parmaiyo's Nalla which has already been counter-graded and the latter for counter-grading the portion to the north of it. The Central Sanitary Board recommend that the latter estimate may be sanctioned and that the former may be abandoned as the cost would be very heavy. They think that the existing arrangement does not cause much inconvenience if the stone-ware pipes under the cross bund are cleared.

26. Draft as per Central Sanitary Board's proposal is submitted.

Mysore City Improvement Trust Board,
Chairman's Office,
Dated, Mysore, 11th August 1908.

No. 751
Enc. 3

From

M. Kantaraj Urs, Esquire, B.A.,

Chairman of the Board of Trustees,

Mysore City Improvements.

To

K.S. Chendrasekhara Iyer, Esquire, B.A., B.L.,

Secy. to the Govt. of His Highness the Maharaja

of Mysore, Gen. and Rev. Departments.

Sir,

I have the honor to submit for sanction of Government the marginally noted estimates, one for filling up the (1)

Estimate amounting to Rs.49,725/- for filling up the Purniah's nalla to the ground level from near Mochi Ghat Police Station to 5" water pipe line along cross bund in continuation of the Rampart Wall road.

ditch known as Purniah's nalla to present ground level, and another

Estimate of the probable cost of counter-grading Puraiah's nalla from Rampart Wall road crossing up to water stagnation, amounting to Rs.4,078.

(2) for countergrading a portion to the north of that estimated to be filled up.

2, The estimates approved for submission to Government by the Board in their resolution No.I passed at a meeting held on 26th May last, copy enclosed, contemplate the filling up of the nalla from the Mochi Ghat Police Station up to the bund in continuation of the rampart Wall Road carrying the 5" water main to Idga. This portion has been counter-raded recently under sanction of Government conveyed ir Proceedings No.7286-89/M1.780-06-4 dated 26th February 1907, but the bund across the nalla carrying the water main referred to practically makes the portion to the south of it into a tank. The outlet by a stoneware 12" pipe at the level of the bu com-

General No. 757
Enclosures five.

SUBJECT
Submits for Sanction two estimates with plans in duplicate in connection with the filling up of the Puniah's Nalla, Mysore City

already choked, and water at present only percolates through. The nalla is still a breeding ground for the malarial musquito and a menace to public health in the areas on both sides of it. The filling up of the nalla up to ground level will greatly improve the health of the New Idga extension, of the Silledar Lines, and of the New Wesleyan Mission Hospital, and the inhabited areas around.

3. The desirability of the proposed reclamation will also be recognised in connection with the prospective utilization, if need be, of the area to the west of the nalla and the Railway line for further extensions of the town.

4. The Dewan Sahib on his inspection of the proposed work has, it is believed, approved of the work being undertaken.

5. The portion to the north of the bund has been ever a pool of stagnant water accountable for periodical outbreaks of cholera and other diseases during the hot weather when the pipe water supply of the town fails and becomes inadequate to the needs of the population. The necessity for filling up this portion and countergrading it to prevent any water standing and stagnating in the ditch, was obvious. The work has been, as a protective measure, in anticipation of sanction, already put in hand and partially executed.

6. The rates provided in the estimate are 2 annas per cubic yard for excavating from the adjoining bunds, and filling the ditch in proximity, and 4 annas for carting earth for filling from the area on both sides of the nalla.

7. The rate of 2as.6ps. for countergrading provides not only for cutting and throwing the earth down the side slopes, but also for pulling the same down from the slopes on to the bed.

8. A sum of Rs.12,000/- has been provided in the budget for the current year in this connection, and it is hoped that a

3

further amount will be made available by reappropriation, to advance the work as far as possible. The estimate cannot obviously be entirely worked out in a year, but will be steadily completed in consecutive years as funds permit.

9. The necessary records in connection with the projects are herewith submitted.

I have the honor to be,

Sir,

Your most obedient servant,

G. Hammond

For Chairman.

HLS

Proceedings of an ordinary meeting of the Board of Trustees for the Improvements of the City of Mysore, held at the Chairman's Office on Tuesday the 26th May 1908.

Sir

I am directed to forward herewith for your information a copy of letter No 180 S. 1. 09 dated 20th instant from the Central Savy Bd's opinion in the matter of filling up and consolidating portions of Ramaiya's Walla in the Mysore City.

2. Referring to the above, I am directed to observe that it is not clear from the Savy Bd's letter whether the Board do not approve of the filling up of the Board's proposal to fill up the ground level of the portion of the walla lying between the Mooche Ghaut Block & the cross bund in continuation of the Rampart Wall Road which has been already consolidated as per Govt. No. 7336-9/Rel 26-6-06 & 26-2-09

OFFICE OF THE SANITARY COMMISSIONER IN MYSORE,

Bangalore, Dated the 24-6-1909

From

Lt.Col.John Smyth, M.D., I.M.S.,
Sanitary Commissioner to the Government of
His Highness the Maharaja of Mysore,
BANGALORE

To K.S.Chandrasekhara Iyer Esq, B.A.,B.L.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments,
BANGALORE

Sir,

In reply to your No. 6778 - 1.92-08 dated the 20th January1909 in re ——— the filling up and countergrading portions of Purnayya's nalla in Mysore City, I have the honor to state that the Central Sanitary Board recognise that the ideal procedure would be to fill up the nalla as recommended by the Trust Board, but as the cost of doing so would be very heavy, they recommend countergrading. As to the dam referred to by the Trust Board as converting the town end of the nalla into a tank, the Sanitary Engineer says the difficulty may be got over by tunnelling the said dam, and my opinion is that it ought to be sufficient to clear the 12" pipes already existing, and which have been allowed to get choked. Mr.D'Cruz told me that several such pipes existed under the dam, the clearing of them should not present any great difficulty, and once clear all fear of a "tank" being formed would be at an end.

2 The connected papers are herewith returned.

I have the honor to be,

Sir,

Your most obedient servant,

Sanitary Commissioner.

with all cover, that latrines be provided and that the water-supply of the locality be amply provided for.

Order thereon 12016-20
ml 9-08
2315 09

Govt. agree with the Central Sanitary Board and are pleased to accord sanction to the estimate of Rs 40,787 for constructing the portion of the road to the north of the cross bund in continuation of the Ramfort Wall Road.

2. The work of filling up the portion of Burnaigal Nalla from the Mochi ghat Police Station to the cross bund need not be carried out at the present. The Chairman is requested to see that the drainage pipes existing under the cross bund are always kept clear and that water is not allowed to accumulate thereon and his attention is invited to the Central Sanitary Board's recommendation about levelling the banks on either side of the nalla so as to do away with all cover providing latrines and water-supply in the locality.

3. It is presumed that these works will be carried out by contract under a system of competition.
